Aurélien Parsy

*Nantes
France*

Pilot Cities Programme

Portfolio Approach

Funded by
the European Union

Portfolio Approach

- ...Pilot Cities of varying **sizes** and that reflect **different starting points** for cities, so as to reflect the **diversity of contexts**
- and maximise **learning, replication, and scaling** potential across the EU.
- This 'portfolio approach' ensures an **EU-level innovation and learning dimension** (i.e., addressing challenges of/at European scale and potentially relevant for many cities to meet European policy objectives) is achieved, as it evolves over the course of the programme.
- A balanced representation of contexts is the most conducive means towards the EC Missions target of change at the EU level, which **goes beyond what can be achieved at the level of individual regions and nations**.
- The selection of Pilot Cities to join the existing portfolio will result in multiple pilot-activity-types, each of which generates a **different test of change and proves diverse types of pathways** – as such, **a cohort of diverse pilots**.
